WHEELS

MICKEY THOMPSON WHEELS ARE BUILT FOR DRIVERS WHO DON'T WANT TO BLEND IN. INSPIRED BY OUR RACING HERITAGE AND ENGINEERED FOR MODERN PERFORMANCE, OUR WHEELS COMBINE CLASSIC STYLING WITH CUTTING-EDGE FITMENTS FOR TODAY'S TRUCKS, JEEPS, AND SUVs. WHETHER YOU'RE CHASING ADVENTURE OR TURNING HEADS ON THE STREET, OUR LINEUP DELIVERS THE STRENGTH, STANCE, AND STYLE TO MATCH YOUR BUILD. FROM FORGED PERFORMANCE TO CAST VERSATILITY, MICKEY THOMPSON WHEELS ARE MADE TO STAND OUT—JUST LIKE THE PEOPLE WHO RUN THEM.

THE WHEEL DESIGN DIFFERENCE

Our cast aluminum wheels combine eye-catching style with proven strength. Precision casting allows for complex, head-turning designs that keep weight in check without sacrificing durability. Match your truck or SUV's personality further with Satin Bronze, Satin Black, or Polished finishes. Make a statement wherever you roll with a set of Mickey Thompson wheels.

THE CASTING PROCESS

1. MELTING THE ALUMINUM ALLOY

Molten aluminum alloy is poured into the wheel cast die.

2. FILLING THE MOLD

The mold is filled using low pressure, feeding the molten metal into the mold cavity from below.

3. SOLIDIFYING THE METAL

The metal is solidified under continued low pressure to increase density and structural integrity.

4. THE END RESULT

The cooled wheel is removed from its mold cavity, flashing is precisely milled away, hubs/bolt patterns are drilled, and an exquisite finish is applied.

SIMULATED BEADLOCK

Simulated beadlock style with genuine 5/8" Zinc bolts for a bold, aggressive look.

FINISHES

Most of our wheels are available in Satin Bronze, Satin Black, and Polished finishes.

WHEEL CAP

Modern low profile cap design.

FITMENT

Fitments for a variety of modern trucks, Jeeps, and SUVs

For those who demand uncompromising quality, durability, and finish brilliance, forged aluminum wheels deliver unmatched value. Engineered through advanced manufacturing processes, they offer superior strength, reduced weight, and precision performance that elevate the driving experience. Set your classic and modern builds up right with Mickey Thompson forged wheels.

GRAIN STRUCTURE

**CAST GRAIN
STRUCTURE**

**FORGED GRAIN
STRUCTURE**

Forged and cast wheels differ in how the metal is formed—and in the level of performance they deliver. Casting pours molten aluminum into a mold, creating a uniform grain structure that allows for versatile design and dependable strength. More than a product—a performance upgrade.

FORGED STRONG

1. BILLET

Wheel production begins with a solid block of billet 6061-T6 aluminum, forming the wheel's foundation.

2. PRESSING

10,000 tons of pressure shapes the billet and aligns the metal's grain for strength.

3. RIM FORGING

The outer rim is shaped under high pressure, ensuring consistent thickness and strength.

4. FINAL FORGING

The wheel undergoes a final high-pressure press to achieve its exact dimensions and structural integrity.

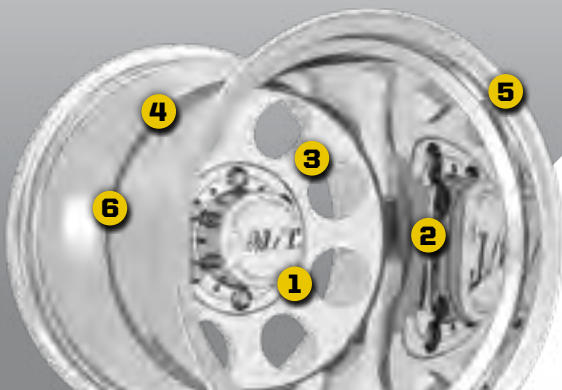

5. CNC AND FINISHING

The wheel is machined to perfection, polished to a bright white finish, and thoroughly inspected for strength and quality.

ALL-NEW MT CLASSIC FORGED

FINISHES: POLISHED

The all-new **MT CLASSIC FORGED** wheel takes the iconic classic 8-hole wheel design to the next level with modern enhancements. Monoblock forged construction with 6061-T6 aircraft aluminum is utilized for superior strength, lighter weight, and enhanced performance compared to traditional die-cast wheels. Showcased in a brilliant white polished finish, this wheel is available in extreme 14" and 16" widths and aggressive 3.5" backsacing. Backed by a Lifetime Limited Structural Warranty, the MT Classic Forged wheel is the perfect choice for both classic and modern builds.

WHEEL FEATURES

- 1. MONOBLOCK FORGED WHEEL**
for enhanced light weight performance and strength compared to die-cast wheels

- 2. 6061-T6 AIRCRAFT ALUMINUM**
for high corrosion resistance and improved durability

- 3. CLASSIC 8-HOLE FACE DESIGN**
with a step lip and deep barrel

- 4. 14" AND 16" WIDTHS**
with 3.5" backsacing

- 5. AVAILABLE IN A 17" WHEEL DIAMETER**

- 6. LIFETIME LIMITED STRUCTURAL WARRANTY**

WHEEL WARRANTY

NOTES

Mickey Thompson Tires warrants to the original purchaser that a new M/T Wheel is free from defects in material and workmanship and agrees to replace a M/T Wheel which fails in normal use and service resulting from defects in material and workmanship for the life of the vehicle for which said wheel was intended and purchased for. Mickey Thompson Tires does not warrant any wheel which has been subject to misuse or abuse including the following:

- (a) Using tires which are oversized according to the standards recommended by the Tire and Rim Association, Inc.
- (b) Loading the wheel beyond the applicable maximum wheel load as specified by Mickey Thompson Tires.
- (c) Any type of racing or activity which subjects wheels to the abuse of racing, whether on the road or off.
